**1999 Salmon Management Plan for Terra Nova River:** DFO representatives could not come to this meeting but will be available for public meeting. Public meeting will be held at the Glovertown Fire hall at 7:30 PM, December 17.

Discussion held on the salmon stats for Terra Nova River and the results of the 1998 management plan.

Extreme options for 1999 management plan are (1) to close river entirely to fishing or (2) treat the same as all other rivers.

Motion: Aus Stewart/Steve Way

That the following be recommended as the 1999 salmon management plan for Terra Nova River.

Terra Nova River & Maccle's Brook  
Proposed Salmon Management Plan - 1999

- A. Retention Limit  
One (1) small salmon per angler for the season.
  
- B. No Fishing Whatsoever  
From 25 metres below Upper Fishway to Terra Nova Lake Dam. This is established DFO no-fishing area. (See Map)
  
- C. Catch & Release Only Areas (See Map)
  - From 25 metres below the top of Morine's Bench upstream to 50 metres above the top of Morine's Bench.
  - From 25 metres above Island Pool upstream to the bottom of Second Steady.
  - From 800 metres below the Upper Fishway upstream to 25 metres below the Upper Fishway.
  - All tributaries above Terra Nova Lake, including the main river.
