

Freshwater – Alexander Bays Ecosystem Corporation

Date: May 31, 2006
Meeting: Regular
Location: R. E. Stroud Bldg
Time: 7:30 P.M.

Present: Scott Pritchett Thomas Hounsell Kevin Stroud

Items Discussed:

- Matt Churchill, CBP&P Ltd.; was unable to attend our meeting at this time, but will be able to attend our next meeting on June 28, 2006.

- Our applications for students (River Monitor Project '06) were mailed on March 29 but when Service Canada received them they were post marked for April 3. They were given a file number and we were advised they were received. Upon checking with Service Canada on May 29 (just before our last meeting) I was advised by Service Canada that our Applications missed the deadline of March 30 and were not considered for this summer. Hence, we have 2 students as River Monitors for this summer under the ABTNDA. Because we only have 2 students on we will not need a co-ordinator for the summer, Terry John, Service Canada was advised.

- The Green Team is in place for the Habitat Project on Northwest Brook this summer.

- The Fishway Attendants are starting on June 5, 2006. They are required to have First Aid and the Boating Course for upriver. We agreed to cover the cost of both courses.

Due to the low attendance, we had a very short meeting but the necessary business was covered.

Our next meeting will be on June 28, maybe you can make it????
